# Contents of Volume 147

Number 1, November 1971

|                                                                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| IUPAC-IUB Commission on Biochemical Nomenclature. The Nomenclature of Multiple Forms of Enzymes. Recommendations (1971).....                                         | 1   |
| IUPAC-IUB Commission on Biochemical Nomenclature. Amendments to the Steroid Rules.....                                                                               | 4   |
| MARIA TERESA COSTA, GIUSEPPE ROTILIO, ALESSANDRO FINAZZI AGR6, MARIA PAOLA VALLOGINI, AND BRUNO MONDOVI. On the Active Site of Diamine Oxidase: Kinetic Studies..... | 8   |
| EUGENE G. HRYCAY AND PETER J. O'BRIEN. Cytochrome P-450 as a Microsomal Peroxidase Utilizing a Lipid Peroxide Substrate.....                                         | 14  |
| EUGENE G. HRYCAY AND PETER J. O'BRIEN. The Peroxidase Nature of Cytochrome P-420 Utilizing a Lipid Peroxide Substrate.....                                           | 28  |
| ANTAL RETHY, VITTORIO TOMASI, AND AGOSTINO TREVISANI. The Role of Lipids in the Activity of Adenylate Cyclase of Rat Liver Plasma Membranes.....                     | 36  |
| C. G. VALLEJO, R. MARCO, AND J. SEBASTIÁN. The Glucose 6-Phosphate Metabolic Crossroads in Brain. Studies at the Enzyme Level.....                                   | 41  |
| M. A. HULME. Viscometric Determination of Carboxymethylcellulase in Standard International Units.....                                                                | 49  |
| ROBERT E. GAENSSLEN AND RICHARD E. McCARTY. Amine Uptake in Chloroplasts..                                                                                           | 55  |
| J. C. VIDAL AND A. O. M. STOPPANI. Isolation and Properties of an Inhibitor of Phospholipase A from <i>Bothrops neuwiedii</i> Venom.....                             | 66  |
| E. GROSS. Uncoupling of Photophosphorylation Inhibition of Proton Binding by Quaternary Ammonium Salts and Zwitterionic Buffers.....                                 | 77  |
| D. HAVLIZA AND G. KOCH. Complex Formation Between Poliovirus RNA and Polycations.....                                                                                | 85  |
| FREDERICK B. RUDOLPH AND HERBERT J. FROMM. The Purification and Properties of Aspartase from <i>Escherichia coli</i> .....                                           | 92  |
| TETSUO HIYAMA AND BACON KE. A Further Study of P430: A Possible Primary Electron Acceptor of Photosystem I.....                                                      | 99  |
| SIGMUND SCHWIMMER, RALPH H. KURTZMAN, JR., AND ERICH HEFTMANN. Caffeine Metabolism by <i>Penicillium roqueforti</i> .....                                            | 109 |
| VICTOR ROCHA AND IRWIN P. TING. Malate Dehydrogenases of Leaf Tissue from <i>Spinacia aleracea</i> : Properties of Three Isoenzymes.....                             | 114 |
| HAROLD B. WHITE III. The Molecular Weights of Glycerol-3-P Dehydrogenases from Chicken, Rabbit, and Honey Bee.....                                                   | 123 |
| M. C. GOODALL. Thickness Dependence in the Action of Gramicidin A on Lipid Bilayers.....                                                                             | 129 |
| DIANA S. BEATTIE. The Possible Relationship Between Heme Synthesis and Mitochondrial Biogenesis.....                                                                 | 136 |
| C. A. FROLIK AND H. F. DELUCA. 1,25-Dihydroxycholecalciferol: The Metabolite of Vitamin D Responsible for Increased Intestinal Calcium Transport.....                | 143 |
| EDMUND R. CASILLAS AND DALE D. HOSKINS. Adenyl Cyclase Activity and Cyclic 3',5'-AMP Content of Ejaculated Monkey Spermatozoa.....                                   | 148 |
| IRWIN P. TING AND VICTOR ROCHA. NADP-Specific Malate Dehydrogenase of Green Spinach Leaf Tissue.....                                                                 | 156 |
| ALAN S. TANISAWA AND JOHN G. FORTE. Phosphorylated-Intermediate of Microsomal ATPase from Rabbit Gastric Mucosa.....                                                 | 165 |
| B. ROE, M. SIROVER, R. WILLIAMS, AND B. DUDOCK. New Heterologous Mischarging Reactions with Yeast Phenylalanyl Transfer RNA Synthetase.....                          | 176 |
| COLIN J. THOMPSON AND IRVING M. KLOTZ. Macromolecule-Small Molecule Interactions: Analytical and Graphical Reexamination.....                                        | 178 |

|                                                                                                                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| DIETMAR RICHTER, LILLIAN LIN, AND JAMES W. BODLEY. Studies on Translocation IX: The Pattern of Action of Antibiotic Translocation Inhibitors in Eukaryotic and Prokaryotic Systems.....                                                                         | 186 |
| THOMAS E. ROCHE, BRUCE A. MCFADDEN, AND JUDITH O. WILLIAMS. Modification of the Active Site of Isocitrate Lyase from <i>Pseudomonas indigofera</i> .....                                                                                                        | 192 |
| RONALD K. H. LIEM, RUDOLPH H. ANDREATTA, AND HAROLD A. SCHERAGA. Mechanism of Action of Thrombin on Fibrinogen. II. Kinetics of Hydrolysis of Fibrinogen-like Peptides by Thrombin and Trypsin.....                                                             | 201 |
| J. A. BEELEY. The Effects of Sulfhydryl-Blocking Reagents on Canine Pancreatic Ribosomes.....                                                                                                                                                                   | 214 |
| RANDOLPH L. RILL AND IRVING M. KLOTZ. Tyrosine Ligands To Iron in Hemerythrin. II. Specification of Residues Involved.....                                                                                                                                      | 226 |
| H. DRUCKER AND S. L. BORCHERS. The Role of Calcium in Thermolysin: Effect on Kinetic Properties and Autodigestion.....                                                                                                                                          | 242 |
| HERBERT WEISSBACH, EDWIN THOMAS, AND H. R. KABACK. Studies on The Metabolism of ATP by Isolated Bacterial Membranes: Formation and Metabolism of Membrane-Bound Phosphatidic Acid.....                                                                          | 249 |
| ILMO E. HASSINEN, REINO H. YLIKAHRI, AND MATTI T. KÄHÖNEN. Regulation of Cellular Respiration By Thyroid Hormone. Spectroscopic Evidence of Mitochondrial Control in Intact Rat Liver.....                                                                      | 255 |
| JOHN F. ROBYT, ROSALIE J. ACKERMAN AND CAROL G. CHITTENDEN. Reaction of Protein Disulfide Groups with Ellman's Reagent: A Case Study of the Number of Sulfhydryl and Disulfide Groups in <i>Aspergillus oryzae</i> $\alpha$ -Amylase, Papain, and Lysozyme..... | 262 |
| WENG Y. LEE, NICOLA A. ATTALLAH, LADISLAS GYENES, AND ALEC H. SEHON. Studies on Rabbit Ribonucleases.....                                                                                                                                                       | 270 |
| EUGENE P. PITZ AND JAKE BELLO. Interaction of Sodium Dodecyl Sulfate with Tyrosyl Chromophores in Ribonuclease A and Model Compounds.....                                                                                                                       | 284 |
| EDWARD D. FINCH, J. FRANK HARMON, AND BURTON H. MULLER. Pulsed NMR Measurements of the Diffusion Constant of Water in Muscle.....                                                                                                                               | 299 |
| KEIJI SHIKAMA. Standard Free Energy Maps for the Hydrolysis of ATP as a Function of pH, pMg and pCa.....                                                                                                                                                        | 311 |
| GARY KOCHERT. Ribosomal RNA Synthesis in <i>Volvox</i> .....                                                                                                                                                                                                    | 318 |
| J. S. CHARNOCK, D. A. COOK, AND R. CASEY. The Role of Cations and Other Factors on the Apparent Energy of Activation of ( $\text{Na}^+ + \text{K}^+$ )-ATPase.....                                                                                              | 323 |
| DONALD L. KEISTER AND NORMA JEAN MINTON. Energy-Linked Reactions in Photosynthetic Bacteria. VI. Inorganic Pyrophosphate-Driven ATP Synthesis in <i>Rhodospirillum rubrum</i> .....                                                                             | 330 |
| RONALD L. MILLER. Chromatographic Separation of the Enzymes Required for Hydroxylation of Lysine and Proline Residues of Protocollagen.....                                                                                                                     | 339 |
| G. RIBEREAU-GAYON, T. RAMASARMA, AND B. L. HORECKER. Fructose Diphosphate Aldolase of Spinach Leaf: Primary Structure Around the Substrate-Binding Site..                                                                                                       | 343 |
| SHORT COMMUNICATIONS                                                                                                                                                                                                                                            |     |
| FRANK SOLOMON AND IRWIN A. ROSE. Significance of ADP-ATP Exchange for the Hexokinase Reaction Mechanism.....                                                                                                                                                    | 349 |
| B. P. SANI AND D. RAO SANADI. Involvement of Thiol Function in the Activity of Energy Transfer Factor D of Mitochondrial Oxidative Phosphorylation..                                                                                                            | 351 |
| MARY E. CARSTEN. Uterine Smooth Muscle: Troponin.....                                                                                                                                                                                                           | 353 |
| AUTHOR INDEX.....                                                                                                                                                                                                                                               | 358 |

Number 2, December 1971

|                                                                                                                                              |     |
